Summary

I am a disciplined and enthusiastic individual with a keen interest in the technical industry. My major strength lies in my passion and dedication towards my tasks and goals. I enjoy working with teams and look forward to applying my skill set to contribute to the company's work.

Professional Experience

03/2026 – Present
Mohali, Punjab

VR AUTOMATIONS
Flutter Developer
- Develop and maintain cross-platform mobile applications using Flutter and Dart.
- Integrate REST APIs and implement responsive, user-friendly interfaces.
- Work on employee management and activity-tracking features.
- Implement authentication, state management, API integration, and reusable UI components.
- Collaborate with the development team to improve application functionality and performance.

01/2026 – 03/2026
Zafferpur, Ambala

SGN SOLUTIONS
Flutter Developer
Specializing in building scalable mobile apps with Dart. Skilled in integrating third-party APIs, optimizing UI/UX for responsiveness, and managing full-stack deployments.

Education

08/2023 – 06/2025
Mullana, Ambala

Masters Of Computer Applications (MCA)
Maharishi Markandeshwar Institute of Computer Technology and Business Management, Mullana

08/2020 – 06/2023
Mullana, Ambala

Bachelors Of Computer Applications (BCA)
Maharishi Markandeshwar Institute of Computer Technology and Business Management, Mullana

Skills

Languages
Dart, JavaScript, TypeScript, SQL, HTML5, CSS3

Tools & Platforms:
Git, GitHub, Vercel, FlutterFlow, Google Play Games Services, AdMob, Postman, Android Studio VS Code

Frameworks & Libraries
Flutter, React Native, Riverpod, Provider, Flame Engine (2D Games)

Architecture & Practices:
Cross-Platform Mobile Development, RESTful APIs, State Management,

Databases & Cloud:
Firebase (Firestore, Authentication, Messaging, Cloud Functions),
, MySQL

Projects

07/2026 – Present

NovaStrike - Flutter + Flame mobile space shooter game

- Built a 1500 level campaign from a deterministic generator seeded on the level number, replacing hand authored content with zero storage cost.
- Designed a custom pseudo 3D renderer and object pooling to hold 60fps with 400 bullets on screen on low end Android hardware.
- Implemented a full audio system with master, music and effects channels, live volume changes, music ducking and per effect throttling.
- Shipped accessibility options including reduced camera shake, high contrast enemy fire and larger bullet rendering.
- Integrated Google Play Games services and AdMob, with 400+ tests covering game logic and UI.

06/2026 – Present

Blocktopus

A block game

- Built a Flutter block puzzle game for Android and iOS with no game engine — board, octopus mascot and all effects rendered via CustomPainter for a 40 MB app size and 60 fps on low-end hardware
- Wrote an offline level generator and depth-limited solver that produced and validated **2,000 levels** across 20 chapters, auto-rejecting any level that was unsolvable, trivial, or beatable by a greedy baseline
- Integrated Google Play Games Services for cloud save with conflict-merging sync, 20 achievements and 3 leaderboards, plus AdMob banner, interstitial and rewarded placements
- Implemented persistence, an undo system with immutable state snapshots, a coach-mark tutorial, and a pitch-ladder audio engine using audioplayers

04/2026 – 07/2026

Team Pulse - Employee management System

Employee management System

I built a cross-platform app for internal team management using Flutter and Firebase. It runs on mobile, web and desktop from one codebase.

- **Attendance:** Location-based check-in/out using geofenced office locations, plus live session tracking.
- **Leave & payroll:** Casual leave, sick leave and work-from-home requests, with leave balances that carry forward. Payroll is calculated automatically, including deductions when someone takes more leave than they're allowed.
- **Work monitoring (desktop):** Activity and input tracking, screenshots uploaded to OneDrive, and break reminders. Sessions are saved when the app closes and recovered if one is left unfinished.
- **Projects & tasks:** Projects, tasks, timelines, comments, file attachments and in-app document preview.
- **Team communication:** Announcements, push notifications (FCM), email digests with deep links, and reports.
- **Tech:** Flutter, Dart, Riverpod, GoRouter, Firebase Auth/Firestore/Messaging, Microsoft Graph (OneDrive), Firebase Hosting.
